Tariff codes / Commodity Codes

When importing into the UK from outside the European Union, we will need you to supply us with the commodity code that you would like us to clear your goods under.

The tariff code / commodity code is a series of numbers that will identify your product and it will determine the percentage of duty and VAT that you pay on the importation of the goods.

In order to find your commodity code, click on the link below and you will be sent to the relevant section on the HMRC website

<https://www.gov.uk/trade-tariff>

Thanks.
